REF: Approved release and cleaning agents

Please take care that only RIEPE release and cleaning agents will be employed, as specified by OTT.

In case of using the wrong release and cleaning agents, damages on top pressure rollers and chain pads can occur.

OTT will not assume any liability for damages occurred by using the wrong release and cleaning agents.

Never use any release and cleaning agents based on water !
Never use any release and cleaning agents based on petrol !

Examples of approved release and cleaning agents:

Release agent LPZ/II:
Prevents the glue residues from sticking to the workpiece.

Release agent NFLY:
Prevents the glue from sticking to the pressure roller and to the tracers.
Prevents the glue from sticking to the tools.

Cleaning agent LP 163/93:
Removes the release agent and the loose glue residues.

Anti-static cooling agent LP 289/99:
Cools the glue gap and de-magnetizes the edge tape.
